Historically, the choice of an entrance door has been limited to timber, which can expand, contract or warp and will require regular maintenance, or PVCu, which lacks the authentic look of wood. **The Castle Collection from** **Safeguard Composite Doors offers the perfect alternative** Manufactured from GRP (Glass Reinforced Plastic), our doors will not rot, warp, crack or splinter and are virtually maintenance free. They are weatherproof, having passed rigorous testing, and offer insulation values far greater than timber doors. High security hinges and multipoint locking systems are fitted as standard, protecting your home and valuables and meeting the Police 'Secured by Design' standard. With the Castle Collection you'll be spoilt for choice - fourteen designs, seven external colour finishes and a beautiful range of decorative glazing options. All doors are supplied with a white internal finish.

A choice of three side panels are available to complement the Balmoral, Caernarfon & Rochester door ranges.

Size limitations apply please refer to technical and survey details before ordering.

As a general size guide only Door and one side panel should be between 1350—1450mm Wide and Door and side light either side should be between 1820—1920mm Wide

Whether you live in a traditional or modern home Safeguard has a design to suit. Each door is made to measure and with such a comprehensive choice of styles, colours and glass designs each door is individually created to add that something special to your home.

Our Castle Collection doors feature an authentic wood grained finish as standard and are available in a variety of external colours as detailed on page one. Internally all doors are white giving a light airy feel to the inside of any entrance or hallway. A white PVCu outer frame is used as standard with the alternative of a foiled finish Rosewood or Antique Oak PVCu also available. (Due to shading differences between Rosewood & Mahogany and Light Oak & Antique Oak it is recommended the Mahogany and Light Oak doors be fitted to white outer frames only).
