WINDOWS

*'Installed in days to last
a lifetime'*

Safeguard
is a new
concept
in window
and door
design.

Its clean, elegant
lines won't look out
of place, regardless
of the style of your
property.

'State-of-the-art'
locking and security
systems will
'Safeguard' your home
and possessions, whilst
cutting-edge technology
ensures insulation
values that 'Safeguard'
the planet and its
valuable resources."

Safe FOR YOU
Safe FOR THE PLANET

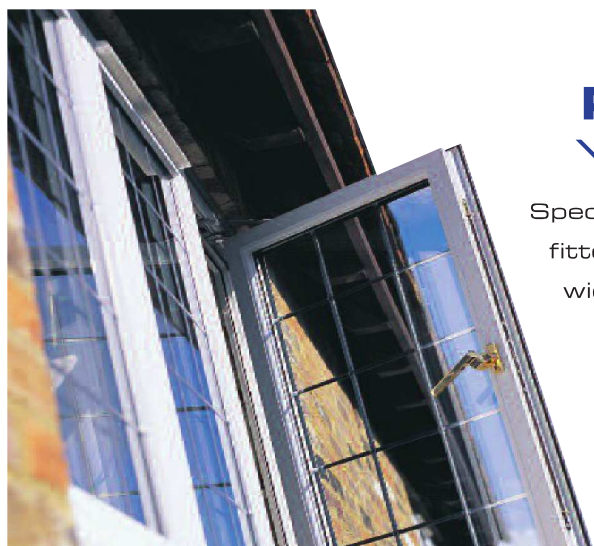

Windows that
will look **good**
for years
to come

In beautiful, stylish and virtually maintenance
free **PVC-U**. So no more painting! Our range
of styles also means we can design your
windows and doors to complement any home -
modern or traditional.

PROTECTING YOUR FAMILY

Special 'fire escape' hinges can be
fitted, where necessary, opening
wider than standard hinges and
allowing you to get out fast
in an emergency.

Restrictor hinges are also
available to further improve
child safety.

TRADITIONAL **CASEMENT** WINDOWS

Casement windows are the most popular choice, offering a traditional design in a wide range of styles.

Easy clean hinges can be requested for that hard-to-get-at window over the porch or conservatory.

TILT & TURN WINDOWS

Our modern Tilt & Turn windows offer the unique, secure 'tilt ventilation' option, as well as opening fully into the room for easy cleaning.

Turn position

Tilt position

White

Rosewood

Antique Oak

CHOOSE THE **COLOUR** THAT **BEST SUITS** YOUR **HOME**.

Five colour options are available - two of them in a two-tone finish, meaning you can have the natural beauty of wood on the outside but still bright white within.

Unlike some woodgrain finishes available Rosewood and Antique Oak faithfully replicate the grain of real timber - they are often mistaken for the real thing!

DOORS

'To create a lasting first impression'

Choose from our Safeguard Range of panelled door options for a front door that really makes an impact. A panelled door can be carefully chosen to allow in plenty of light or give a feeling of privacy - ideal if it opens directly on to a pavement or heavily travelled area.

A half-glazed door is the ideal kitchen door or can make a light, stylish front entrance with decorative glazing, where privacy is not the main requirement.

Fully-glazed doors are ideal for that view of the garden - and beyond.

Because of their advanced level of security, all doors in the Safeguard Range are backed by 'Secured by Design', a police initiative. Multipoint locking systems incorporate hook locks for security, as well as cams to provide compression to keep out draughts. High quality double gasket seals complete the picture. Our locking system meets all the latest standards for security including PAS23 and 24 and is approved by the 'Association of British Insurers'.

THE BEAUTY OF WOOD ...WITHOUT THE DRAWBACKS

Safeguard GRP composite doors replicate the grain of a timber door, but won't rot, warp, crack or splinter and are virtually maintenance-free.

Colour options include black, blue, red, green and white outside - with a white grained finish internally. Two classic woodgrain finishes are also available.

SAFETY GLAZING

Is always used in our doors, normally in the form of toughened double glazed units. Laminated glass can be

WITH FRENCH DOORS WIDE OPEN THE ROOM ALMOST BECOMES PART OF THE GARDEN.

Popular options include Georgian style glazing, and doors can be made to open inwards or outwards in 5 colour finishes.

Security is provided by the same high security locking mechanism fitted to our entrance doors, to leave you feeling safe and sound.

FRENCH AND PATIO DOORS

'Really bring the outside into your home'

ANTI-LIFT BLOCKS AS WELL AS A SIX POINT ANTI-JEMMY LOCK FITTED TO OUR SLIDING PATIO DOORS ARE THE IDEAL DETERRENT TO WOULD-BE INTRUDERS.

By sliding to open they don't intrude into a porch or conservatory - but still give any room that light and airy feel.

Toughened or laminated double-glazed units add the final touch to our whole range of doors and patio doors. Whatever your choice, you can let the outside into your sitting room in perfect comfort and safety all year round. A tilt & slide patio door adds the

ADD STYLE
AND VALUE
TO YOUR HOME

...with a beautiful new living space

**SAFEGUARD CONSERVATORIES
ARE AVAILABLE IN A RANGE OF
BESPOKE DESIGNS, LIMITED ONLY
BY YOUR IMAGINATION.**

Our experience and expertise means that we can often exceed your expectations of what can be done, to provide a beautiful new living space.

We'll take into account your own individual needs to create anything from a playroom or office, to a dining or sitting room that can be used all

natural light where required, or cut down heat and glare on a southern elevation. We can advise on the best methods of heating - or cooling - as well

You can choose from a full-height wall on one side for extra privacy, or an all-round dwarf wall giving you an internal shelf for that treasured ornament or favourite plant. Fully glazed options make the most of the garden.

THE EDWARDIAN

Is stylish as well as spacious, as the name suggests. With its clean, simple lines it makes the most of available space and adds that little touch of class.

THE SUN LOUNGE

Is ideal for a bungalow, or single-storey extension. Both practical and versatile - surely the best value-for-money home extender.

THE VICTORIAN

Offers traditional styling with its distinctive roof design. A beautiful addition to any home.

THE 'P' SHAPE

THE CHOICE IS YOURS...

Our computer-assisted drawing package helps you see before you buy, to ensure you make the right choice for the property.

THE GABLE END

WINDOWS

that won't cost the earth...

...WITH LOWER FUEL BILLS TOO!

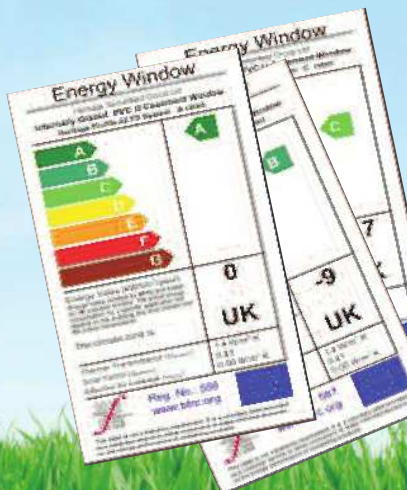

"Thanks to their outstanding energy efficiency, Safeguard windows outperform ordinary windows by at least 30% - keeping your home cosy and warm, as well as reducing wasteful heat loss.

Only products that achieve the highest standards of energy efficiency are endorsed by the ENERGY SAVING TRUST in a certification scheme backed by the Government.

Certified by the BFRIC, Safeguard windows achieve energy ratings from 'C' right up to 'A'.
- saving money as well as precious natural resources.'

- Reduced heat loss means lower energy consumption
- As a rot-free alternative to wood, PVC-U saves millions of trees worldwide
- Low energy manufacture reduces harmful gas emissions
- PVC-U frames can be easily recycled
- Lower CO² emissions
- Reduced condensation

the **safe** GUARD range

PEACE OF MIND GUARANTEED

Our PVC-U profiles and glass carry the BSi kitemark standard, and profiles have been shown to be colourfast both by accredited bodies such as the British Standards Institute as well as by decades of exposure to our unique climatic conditions.

Our qualified installation teams will take care of your property in exchange for a smile and the odd cup of tea! We clean up after ourselves, removing all rubbish, leaving you to sit back, relax and enjoy the view.

COMPLIANCE FENSA

Replacement windows and doors must now meet new government regulations on energy conservation. Selling your property can be a problem if you can't demonstrate compliance. Safeguard windows easily exceed the standards required. Examples of recognised independent bodies which can authenticate this are FENSA, CERTASS and your local building regulations officer. (Conservatories are, as yet, normally exempt from these requirements - but it's worth checking with us first).
